

The TESLA Sound RB150 alarm clock can be used in several ways. As an FM radio for listening to your favorite radio stations, an alarm clock that wakes you up in the morning and also as a charging base for your mobile phone.

Large clear display

The led display with white digits is perfectly readable day and night. It also offers the ability to change the intensity of the backlight, so you can set the value that suits you best.

Alarm clock

Setting the alarm to the desired time is very easy, you have a choice between 5 alarm sounds. It is possible to set the wake-up call at a specific time with the possibility of repetition on weekdays or all days. If getting up is a nightmare for you, you'll appreciate the delayed wake-up function, which gives you an extra 5 minutes in a warm bed – after which the alarm clock is activated again.

FM radio reception

Want to listen to your favorite radio stations? No problem! Just plug in the power cord that will serve as the antenna and choose the station you want to listen to.

Charging base for mobile phone

Tesla Sound RB150 does not only serve as an alarm clock and FM radio. It can also be used to charge your mobile phone in two ways. Modern QI wireless technology (if your mobile phone is equipped with this technology) or via a USB cable.

Bluetooth for music playback

Bluetooth wireless technology can also be used, through which you can easily connect a mobile phone to the radio alarm clock and play your favorite music.

Backup battery

In case of unexpected power failure, the radio alarm clock is equipped with a backup battery that supplies power for up to 2 hours of music playback and you are not in danger of falling asleep during a power outage.
